15760 Balancing

JOC Note: New Equipment Includes Testing & Balancing. Use these Items For Testing And Balancing Of Existing Systems.

15761 0010 Balancing, air

1002	Balancing, centrifugal fans	EA	179.46	
1102	Balancing, heating & ventilating units	EA	269.26	
1202	Balancing, in-line fan	EA	269.26	
1302	Balancing, propeller & wall fan	EA	50.86	
1402	Balancing, roof exhaust fan	EA	119.68	
2502	Balancing, multi-zone AC and heating unit	EA	179.46	
2602	Balancing, cost per zone, over 1 zone for multi-zone	EA	59.84	
2702	Balancing Fan Section Exhaust	EA	75.27	
3002	Balancing, diffusers, registers, grills, avg ceiling height	EA	35.91	
3003	HVAC Duct Sys, Ceiling Hgt To 12' Supply, Return, Exh, Register&Diff	EA	35.91	
3102	Balancing, diffusers, registers, grills, high ceiling	EA	53.86	
3202	Balancing, diffusers, registers, grills, floor height	EA	29.92	
3602	Balancing, lab hood	EA	179.46	
3710	Balance Constant Volume Box	EA	26.48	
3712	Balancing, linear diffuser	EA	89.77	
3730	Balance General Hood	EA	22.56	
3740	Balance Induction Unit	EA	24.49	
3750	Balance Mbduline - Master	EA	22.55	
3760	Balance Mbduline - Slave	EA	11.28	
3770	Balance Dampers	EA	6.71	
3780	Balance Regenerators	EA	150.40	

15761 4000 Air Conditioning Equipment

4001	Balancing Central A/C Station	EA	289.18	
4002	Balancing Built-Up LP Unit	EA	253.07	
4003	Balancing Built-Up Hp Unit	EA	289.18	
4004	Balancing Package A/C Unit	EA	108.45	
4005	Balancing Rooftop Heat&Cool Unit	EA	144.59	
4006	Balancing Multi-Zone HVAC Unit	EA	180.74	
4007	Balancing Built-Up Hp Dual Duct Unit	EA	361.48	
4008	Balancing Built-Up Hp Variable Volume Unit	EA	433.85	

15762 0010 Balancing, water

0052	Water balancing, air cooled condenser	EA	105.91	
0102	Water balancing, cabinet heater	EA	36.31	
0202	Water balancing, chiller	EA	257.28	
0302	Water balancing, convactor	EA	30.26	
0402	Water balancing, water convertor	EA	151.28	
0502	Water balancing, cooling tower	EA	196.77	
0602	Water balancing, fan coil & ventilator	EA	54.46	
0702	Water balancing, fin tube & radiant panels	EA	60.51	
0802	Water balancing, main & duct re-heat coils	EA	55.98	
0902	Water balancing, main balancing valves	EA	45.38	
1002	Water balancing, pumps	EA	133.12	
1102	Water balancing, unit heater	EA	42.36	
1202	Water balancing, boiler	EA	133.12	

15763 Exhaust systems

15763 0100 Complete Overhead Exhaust System

Note: Includes Tubing storage reels, high temperature tubing, cable winch, blast gate, cone adapter and mounting hardware

0110	6 Inch Dia., 20 Foot Tube		2,914.41	
0120	8 Inch Dia., 15 Foot Tube		3,482.58	
0130	10 Inch Dia., 15 Foot Tube		4,300.88	

15763 0500 Engine exhaust, garage, in-floor system

Note: Accessories for metal tubing, (overhead systems also) Adapters, for metal tubing end.

MNOR CSI	DESCRIPTION	UOM	TOTAL DIRECT UNIT	DEMOLITION UNIT COST
0920	Exhaust sys, eng exh, 3" tail pipe type, in-fl, adptr, for met tubing	EA	25.47	
0930	Exhaust sys, eng exh, 4" tail pipe type, in-fl, adptr, for met tubing	EA	26.48	
0940	Exhaust sys, eng exh, 5" tail pipe type, in-fl, adptr, for met tubing	EA	27.50	
15763 1200 Tubing, galvanized, flexible

16100 Conductors & Grounding

16108 Conductors

Note: 1. Based On 100 Ft (30M) Run. 2. Pulled In Conduit, Except As Noted. 3. Maximum Height Up To 14 Ft. 4. Working Foreman, Unloading, Handling, Pull Wires, Pulling Branch Circuit Conductors, testing, Splicing, Cleanup, New Work Only. 5. All Conductors Are Copper, Except As Otherwise Noted. No Special Set-up Is Required.

16325 0010	Panelboards			
16325 4000	Unassembled			
Note: The Prices, Daily Outputs, Weights And Volumes In This Section Are Set Up As Follows: 1. Panelboard Data Includes The Main Device (Lugs, Breakers) And That Portion Of The Panel Box, Trim And Interior Occupied By That Device 2. Branch Circuit Breaker Data Includes The Breaker Itself And That Portion Of The Panel Box, Trim And Interior That The Device Occupies 3. Spaces Include That Portion Of The Panel Box, Trim And Interior Reserved By That Space 4. The Maximum Single Pole Capacity Of The Panelboard Main Device (Lugs, Breakers) Is Indicated 5. Data For A Complete Panelboard Will Be The Sum Of Main Device Data And The Branch Circuit Breakers And Space Data (Within The Capacity Of The Main Device). This Sum Will Include Main And Branch Breakers Along With The Panel Box, Trims, And Interior.
